TEH CAMP MEETING 94  
SEPTEMBER 22–25, 2022  
NOT QUITE  
FENGERSFORS, SWEDEN  
www.notquite.se

DO IT TOGETHER

NOT QUITE

## Welcome to Fengersfors and Not Quite!

Not Quite is a member-driven organisation where all members are active in creative professions such as professional artists, designers and musicians.

During its 20 years of existence, Not Quite has been exploring and finding new ways of creating sustainable working conditions for creative people in rural areas. Despite being a small organisation, often with small funds and resources, Not Quite is now - thanks to its engaged community - pointed out as one of the best examples of rural development both regionally and nationally.

What started as an experiment for a group of art students from the Academy of Arts and Design (HDK) in the neighbouring village Dals Långed became a long-term project that manage to turn the development of the small village Fengersfors from one in decline to one in growth with new inhabitants and businesses popping up every year.

Not Quite's four employees share one full-time position and most activities (including property management) are done voluntarily by the 70 members. This makes us constantly come back to the importance of doing things together. It is how we find sustainability, how we create an inspiring working environment, how we get things done and how we have a lot of fun doing it!

## NOT QUITE is

... a parrot in the spruce forest  
... a silver thread in the rag board  
... a little bit of New York  
... in the middle of the periphery
